

The Clearing Corporation of India Ltd.

RMD/SS/BT/20/02

Dated : 13th May'20

Securities Segment

Back Testing Results of the effectiveness of using yield spreads/illiquidity related adjustments during the month of Apr'20.

In terms of Para 3 of Notification No.RMD/SS/09/13 dated 28th August'09, yield spreads and spreads in terms of Rupees & paise are being used to factor in impact of illiquidity for the purpose of valuation

2. Improvement in terms of bringing model prices of securities closer to weighted average of traded prices could be achieved during Apr'20 as under:

S.No.	Category	Improvement in no. of cases*
1	Government of India Securities	90.91%
2	Special Securities issued by Government of India ^	0.00%
3	State Government Securities	100.00%

*Difference of less than Rs. 0.50 ignored.

^No trades were observed

3. There were 6 cases of GOI securities where due to yield spread and illiquidity related adjustments, the model price moved away from weighted average of traded price by significant margin (Rs.1 or more).

4. Detailed document is available with us and can be accessed with specific request during current month.
